EDUCATE. UNIFY. MOBILIZE.

Biden, OSHA Stick It to Americans with Oppressive ‘Vaccine’ Mandates

WOODLAND PARK, CO, November 5, 2021 – Following through on Joe Biden’s threat, [the Occupational Safety and Health Administration recently released](#) its coercive rules mandating experimental COVID-19 ‘vaccines’ for American workers. Beginning Jan. 4, employers with more than 100 workers will be heavily fined if they do not force all of their employees to have the injection. Workers who refuse to subject their bodies to experimental treatments will also be required to wear masks and submit to weekly testing.

The new edict from OSHA will cover approximately 84 million workers nationwide, not counting similar rules by other agencies governing healthcare workers, government employees, and contractors. If the edict is allowed to stand, countless Americans will have to choose between losing their jobs and accepting a foreign substance into their body.

The vaccine mandate applies regardless of whether the worker is at risk for contracting COVID. In fact, the agency material on the new regulation specifically states that workers who have already had COVID must still be vaccinated, even if they have natural immunity to the disease.

Opponents of the mandate believe the agency has no authority to make such a sweeping declaration. OSHA was created to regulate workplace hazards, not healthcare. The Biden administration attempts to justify the unprecedented intrusion into personal freedom by the fact that COVID can be contracted at work. Under that reasoning, critics say, OSHA could regulate any contagious disease, and Congress never intended to give that level of power to that agency.

The Centers for Disease Control maintains a website where adverse reactions to vaccines can be self-reported, called VAERS. Civil liberty attorneys at Liberty Counsel monitoring [VAERS](#) are sounding the alarm. They [report as follows](#):

As of Oct. 22, 2021, VAERS reported 17,619 deaths, 86,542 hospitalizations, 94,163 urgent care visits, 32,305 severe allergic reactions, 10,956 cases of myocarditis/pericarditis and 27,277 permanent disabilities resulting from COVID-19 ‘vaccinations.’

According to Liberty Counsel, reported adverse reactions to the experimental COVID vaccines now equal the total combined number of adverse reactions to all other vaccines reported on VAERS in the entire 30-year history of the database.

Untold thousands of Americans are also refusing the injections due to religious and moral convictions, especially those stemming from the fact that the vaccines were developed with research that exploited cells derived from aborted human babies.

The new regulation brazenly drafts private businesses to become the enforcement mechanism of the federal government. Incredibly, employers reportedly face fines of up to \$14,000 *for every violation*.

The Biden administration apparently could not care less about the will of the public. Biden's unconstitutional mandate was issued only two days after voters in Virginia, New Jersey, and other cities across America rejected progressive candidates in shocking upsets. Many see the mandate as yet another example of leftist disregard for personal liberty.

In addition to the Biden's administration's indifference to the alarming evidence of serious widespread adverse effects from the vaccines, many question why the mandate is necessary at all given the fact that COVID has a 99 percent survival rate among the general public. What's more, research demonstrates that the so-called vaccines have limited effectiveness in preventing infection and are relatively short lived.

According to Richard Harris, executive director of Truth & Liberty Coalition, "The progressive assault on freedom in this nation has hit a terrifying new low. Experimental injection in the bodies of unwilling "patients" sounds more like Nazi Germany than the United States of America. The usurpation of private businesses to become instruments of government coercion should shock us all. Americans must rise up now and refuse to comply. We must draw a line in the sand and defend our freedoms. A government that is powerful enough to force innocent people to receive a dangerous, experimental injection is powerful enough to take away *all* our rights."

Truth & Liberty encourages Americans to oppose oppressive mandates by contacting their U.S. representatives, senators, and [OSHA](#).

[Liberty Counsel](#), [First Liberty](#), and [Alliance Defending Freedom](#) are also offering legal help for those who are standing against mandates.
